EDUCATION

Melbourne, Victoria	Swinburne University of Technology	Feb 2022-Dec 2025
• Bachelor of Computer Science. GPA: 3.7 • Diploma of Information Technology (Advanced Programming) • Certificate IV in Information Technology (Programming)		
Melbourne, Victoria	Academy of Interactive Entertainment	Feb 2019-Dec 2020
• Certificate III in Information, Digital Media and Technology		

TECHNICAL EXPERIENCE

Personal Website: www.dhanveer.dev (for additional information and projects)

Signals (www.dhanveer.dev/signals)

- Grid based puzzle game developed in the Unity game engine.
- Intricate documentation with MKDocs hosted at docs.iceboxgames.dev
- Highly decoupled event based architecture with scriptable object events.
- Created a custom puzzle creator that serialises the levels as JSON that you can play and edit on the fly.
- All code hosted on my custom Gitea server
- Utilised: Unity, C#, FMOD, MKDocs

Harchy

- Designed and implemented a custom PHP MVC framework
- Added full CRUD functionality
- Implemented sophisticated role based access control with admin dashboard
- Designed a highly modular and normalized MySQL schema
- Docker compose script to ease collaboration burdens
- Created many shell scripts to facilitate common database operations.
- Utilised: PHP, MySQL, Bash, HTML/CSS, JS, Docker

CSV Parser

- CSV parsing library in C
- Read and write to CSV files as well as edit entire rows
- Added pretty printing
- Implemented 'header-only' strategies to minimise integration complications (similar to stb)
- Utilised: C

Greenflex Dashboard

- Helped create a dashboard for monitoring sensors
- Utilised: ReactJS, NextJS, TS

ADDITIONAL EXPERIENCE

- **Linux and Hosting** I daily drive Arch Linux and all my projects are self hosted on my custom Debian server.
- **Open Source:** I have experience forking and modifying open source code. Including a custom [DWM](#) patch and a [Neovim](#) theme.
- **Git:** I'm familiar with the GitHub Flow branching strategy.
- I worked as a Tiler in 2021

LANGUAGES AND TECHNOLOGIES

C++, C#, Bash, JS, TS, HTML/CSS, Docker, Git, React, Unix, PHP
